

## IN THE JOURNEY OF SUCCESS

**“No matter how many times you fail,  
try for success.”**

Fathimath Sahiyya 12A

First of all, believe in yourself that you can achieve your target. Secondly, burn the midnight oil to achieve your goal with full confidence. Self confidence and hard work are the key to success. Thirdly, try to achieve your aim. Whatever obstacles you face, destroy and overcome them. In the journey of success remember always, “No pains, no gain.” Without difficulties and pains you will never achieve your dream.

Also, while trying to achieve your goal, sometimes you will make mistakes, but remember, by making mistakes only you will learn. Moreover, always be ready to learn a lesson from your mistakes and go ahead. Then nothing can stop from reaching to the stars. **Z**

(ADAPTED FROM Misraab, Issue 5 July 2009)

## Science

350 parts per million is what many scientists, climate experts, and progressive national governments are now saying is the safe upper limit for CO<sub>2</sub> in our atmosphere.

Accelerating arctic warming and other early climate impacts have led scientists to conclude that we are already above the safe zone at our current 387ppm, and that unless we are able to rapidly return to 350 ppm this century, we risk reaching tipping points and irreversible impacts such as the melting of the Greenland ice sheet and major methane releases from increased permafrost melt.

There are three numbers you need to really understand global warming, 275, 390, and 350. To learn more about this, visit [www.350.org](http://www.350.org).

## COOL WEBSITES FOR TEACHERS AND STUDENTS

<http://www.edhelper.com>

Are you on lookout for a wide range of educational tools for different age -groups, then you can take recourse to edHelper.com! This site provides learning tools from pre-school age to high school. You also have easy access to learn foreign language through this site.

[www.worldbook.com](http://www.worldbook.com)

This site comes handy for those people who are on lookout for formidable research guides. They also have sections devoted to- atlas, dictionary and encyclopedia.

[www.metmuseum.org](http://www.metmuseum.org)

Many of the sites at KidSites can be amateurish or boring, so it can take some searching to find that special gem of a site. In the Arts category, my own personal favorite comes from [The Metropolitan Museum of Art](http://www.metmuseum.org) in New York City. Their section for kids features a long list of online applications where kids can learn about color, go on Aaron’s Awesome Adventure (the site will even read the story aloud to your child!), as well as a long list of other fun games and activities that exposes kids to the exciting world of Art. My personal favorite comes from artist Romare Bearden, a unique urban artist who produces some of the coolest art I’ve seen. His own website application for kids offers them activities that they can do with some of his art – I don’t know a kid alive who wouldn’t have a blast with these activities and the graphics.

[www.discovery.com](http://www.discovery.com)

There are many questions of your child that you find difficult to answer. Hence, this site virtually gives information on life science, vivid facets of natural beauty in the form of graphical representation.
